

Help the President find out what the CIA is doing.

That's the assignment handed ex-acrobat and OSS man Ringling Wallenda Grove by an irate President. Using "old-fashioned" cloak and dagger techniques in the computerized intelligence world of today, Grove tracks down Project Neptune to beautiful Hawaii. There he receives welcome assistance from an unexpected quarter in outwitting both the CIA and FBI, while thwarting a Communist plot of staggering proportions. Utilizing his vast knowledge of marine science, Philip Wylie has written an exciting suspense novel that combines "Andromeda Strain" expertise with the best elements of the classic espionage thriller.
